

AUTOSAR 4.3.x (Classic Platform) Software

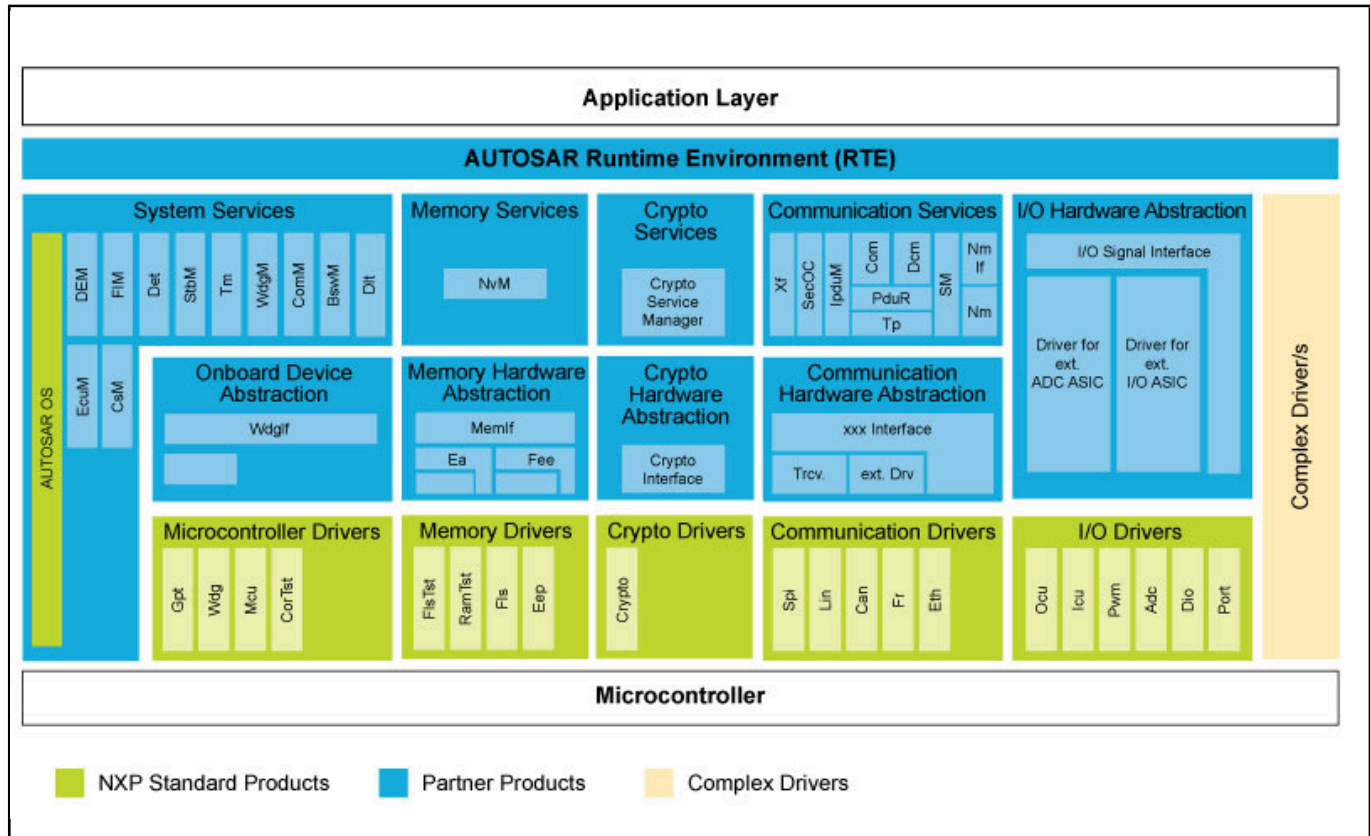

AUTOSAR-4-3

Last Updated: Apr 13, 2022

AUTOSAR (Classic Platform) 4.3 introduces support for Vehicle2X communication and extends the cryptographic features of AUTOSAR towards a complete cryptographic protection stack: Crypto Service Manager, Crypto Interface, and Crypto Driver (now included in the NXP MCAL software package). AUTOSAR (Classic Platform) 4.3 targets automotive and industrial, except for ultra-hazardous applications.

AUTOSAR (Classic Platform) 4.3 modules from different vendors can be integrated as MCAL module specs are mostly unchanged from 4.2. Module integration from different AUTOSAR versions is not recommended.
