Last Updated: Mar 3, 2026

The FRDM#IMX95 is a low#cost, compact development board built on the powerful i.MX 95 applications processor in a 15 mm x 15 mm package. Designed for rapid prototyping and evaluation, it delivers advanced AI acceleration, rich multimedia performance and connectivity based on Wi-Fi 6 Tri-Radio IW612 M.2 module ideal for modern edge designs.

With flexible expansion interfaces, comprehensive software enablement and integrated GoPoint, an intuitive demo interface that simplifies exploring key use cases, the FRDM#IMX95 is perfectly suited for advanced HMI systems, industrial networking, edge gateways, vision processing and AI#driven applications.
