The IW610G-M2 is an M.2 card based on the IW610 Wi-Fi 6, Bluetooth Low Energy (LE) and 802.15.4 tri-radio solution, designed to bring wireless connectivity to the MCX N947 and i.MX 91 evaluation kits.

The module can be stacked on the FRDM-MCXN947 using a compatible FRDM adapter board for MCX, unlocking wireless connectivity for MCX N947-based prototyping. It can also be used directly with the i.MX 91 evaluation kit (EVK) to support Wi-Fi 6, Bluetooth LE and 802.15.4 connectivity.
