

32-Bit Microprocessor

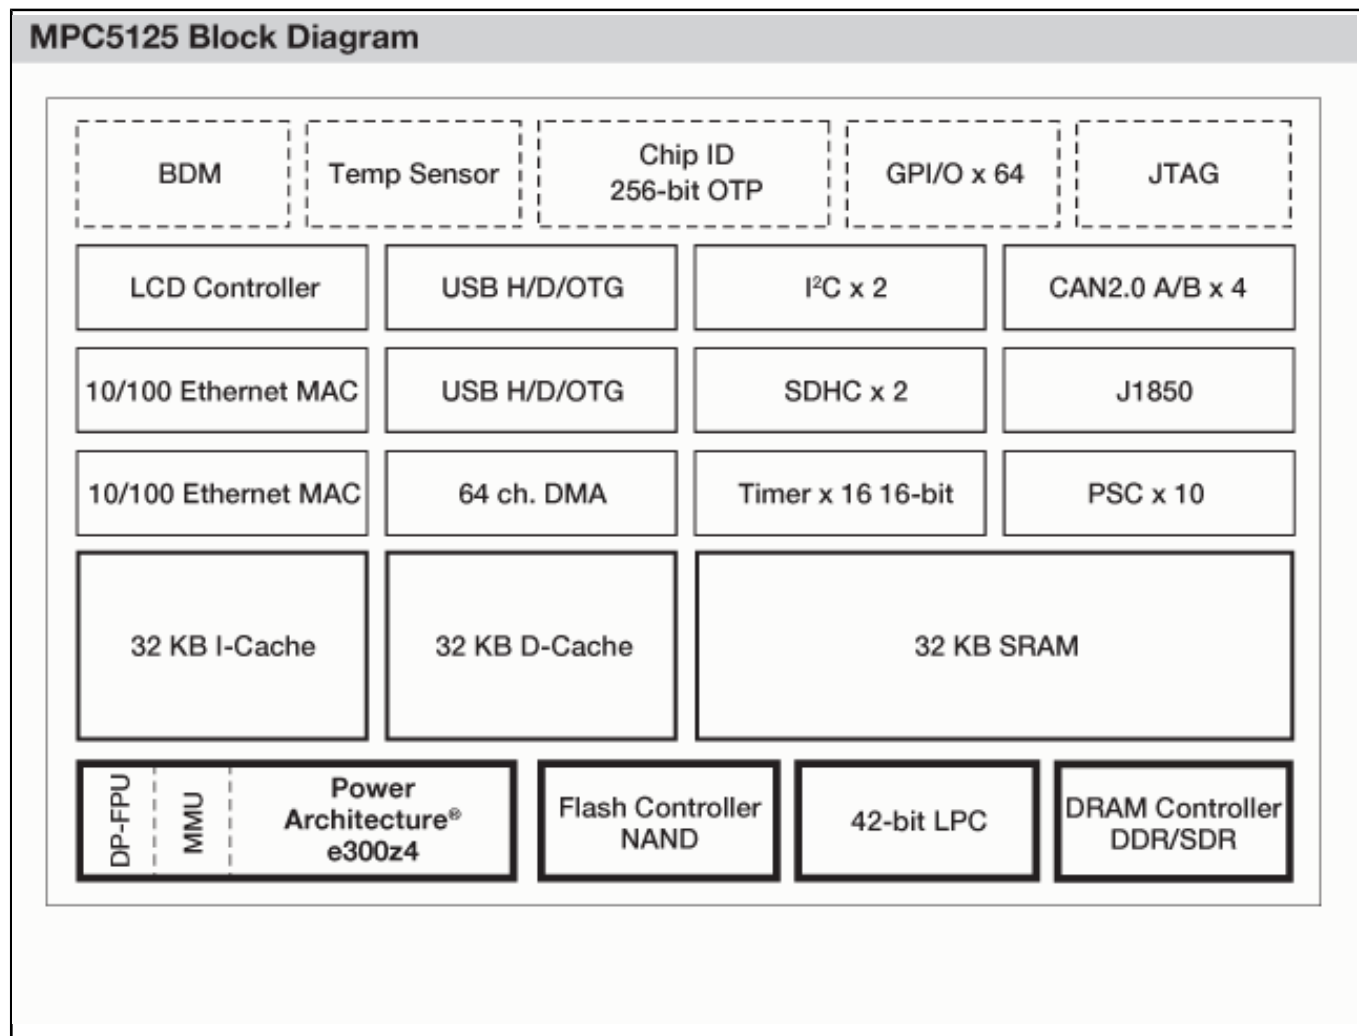

MPC5125

Last Updated: Dec 15, 2024

The MPC5125, a cost and power consumption optimized, automotive, industrial networking, and human-machine interface (HMI) solution. It helps reduce your development time, provides more communication peripherals at a competitive price and delivers ultra-low power without sacrificing performance.

The MPC5125 is a member of the mobileGT family of processors. NXP® is working closely with mobileGT alliance member companies to provide widespread firmware and software driver support. This includes support for popular real-time operating systems from Green Hills, QNX and Wind River, as well as open-source Linux® solutions.
