

32 Bit Microcontroller

MPC565

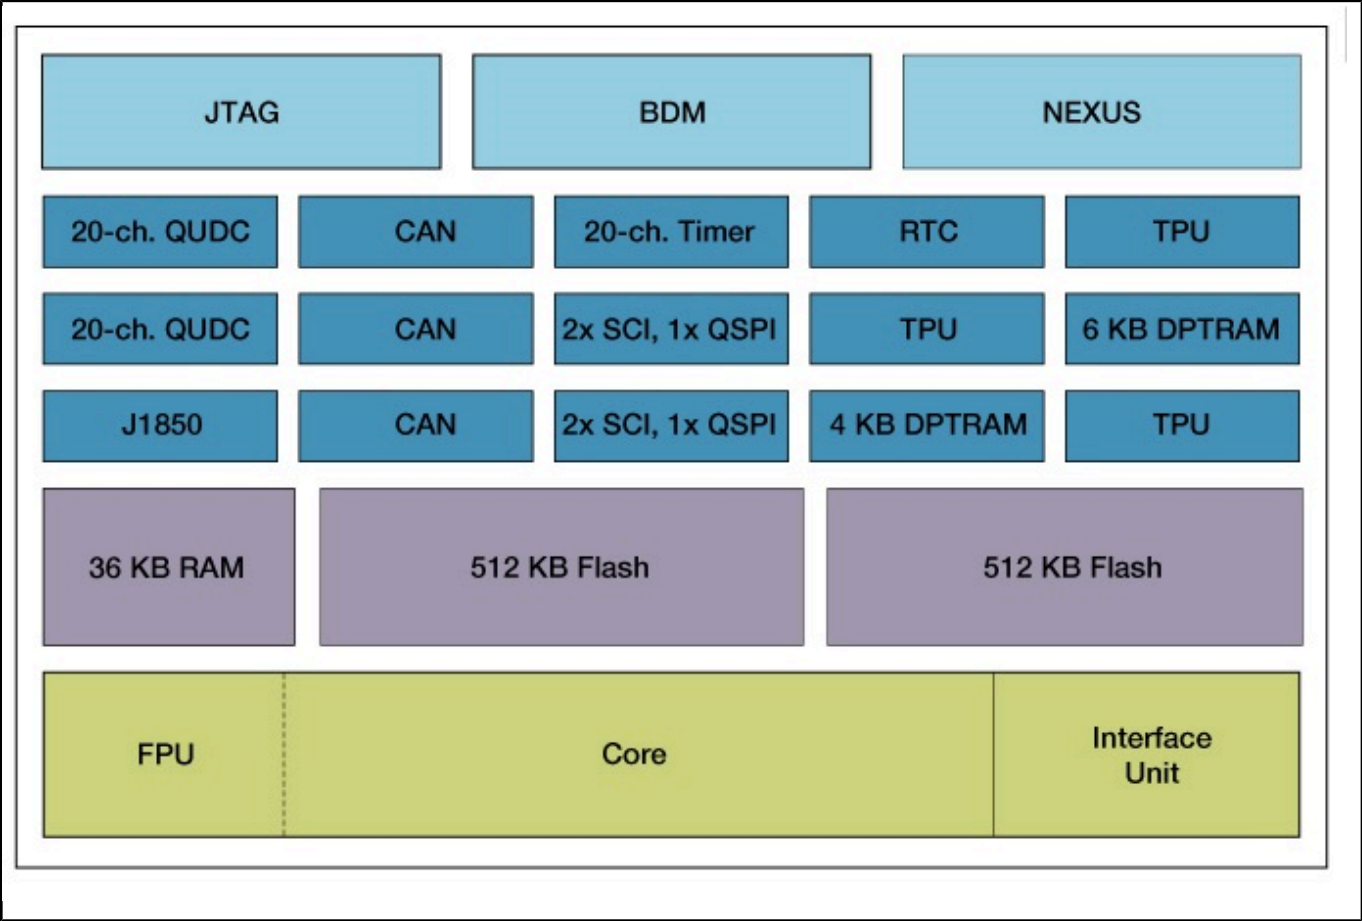

Archived

MPC565 is EOL and not recommended for new designs. Last order 16 June 2025. NXP has no replacement offering. In cases where MPC565 is absolutely required, customers may reach out to Rochester Electronics to check available stock.

Last Updated: Aug 8, 2025

The MPC565 is a member of the MPC500 family of microprocessors that implements the Power Architecture® instruction standard architecture. The MPC565 is integrated with a floating point unit, an advanced peripheral set and 1 MB of flash memory on a single chip. This combination is ideal for high-performance automotive applications as well as other control-intensive applications.
