AM32-Compliant Electronic Speed Controller for Drones: Open-Source and Compact BLDC Motor Controller

MR-ESC-AM32 NEW

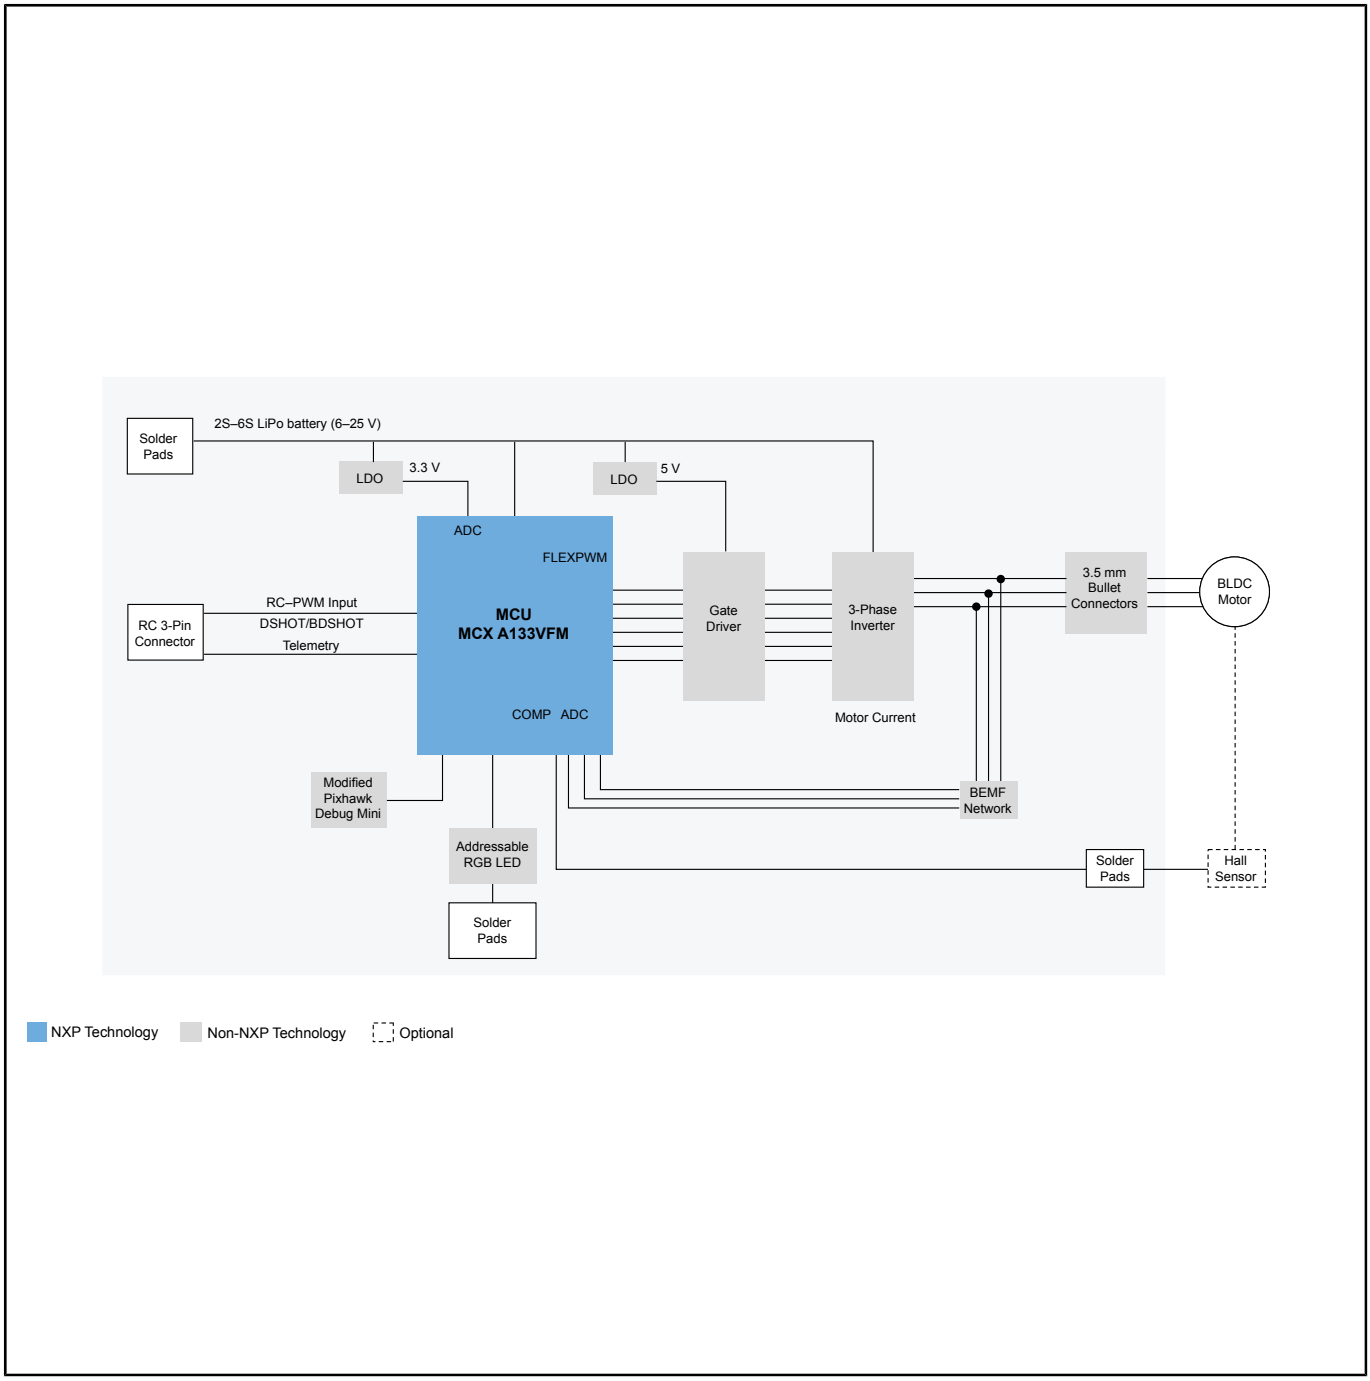

Preproduction

本ページには、試作段階の製品に関する情報が含まれています。記載されている仕様および情報は、予告なく変更される場合があります。詳細については、担当営業までお問い合わせください。

Last Updated: Nov 6, 2026

The AM32-compliant electronic speed controller (ESC) is an open motor control platform designed for drone and robotics propulsion applications. Built around the widely adopted AM32 ecosystem, the ESC enables flexible motor control and supports rapid prototyping and customization. Its compact reference design helps reduce system size and weight, while reusable hardware and open source software simplify ESC development. The platform helps reduce development effort, design cost and risk while enabling developers to optimize propulsion performance for application-specific requirements.
