NavQ95: AI-Powered Autonomy Compute and Flight Controller

MR-NAVQ95 NEW

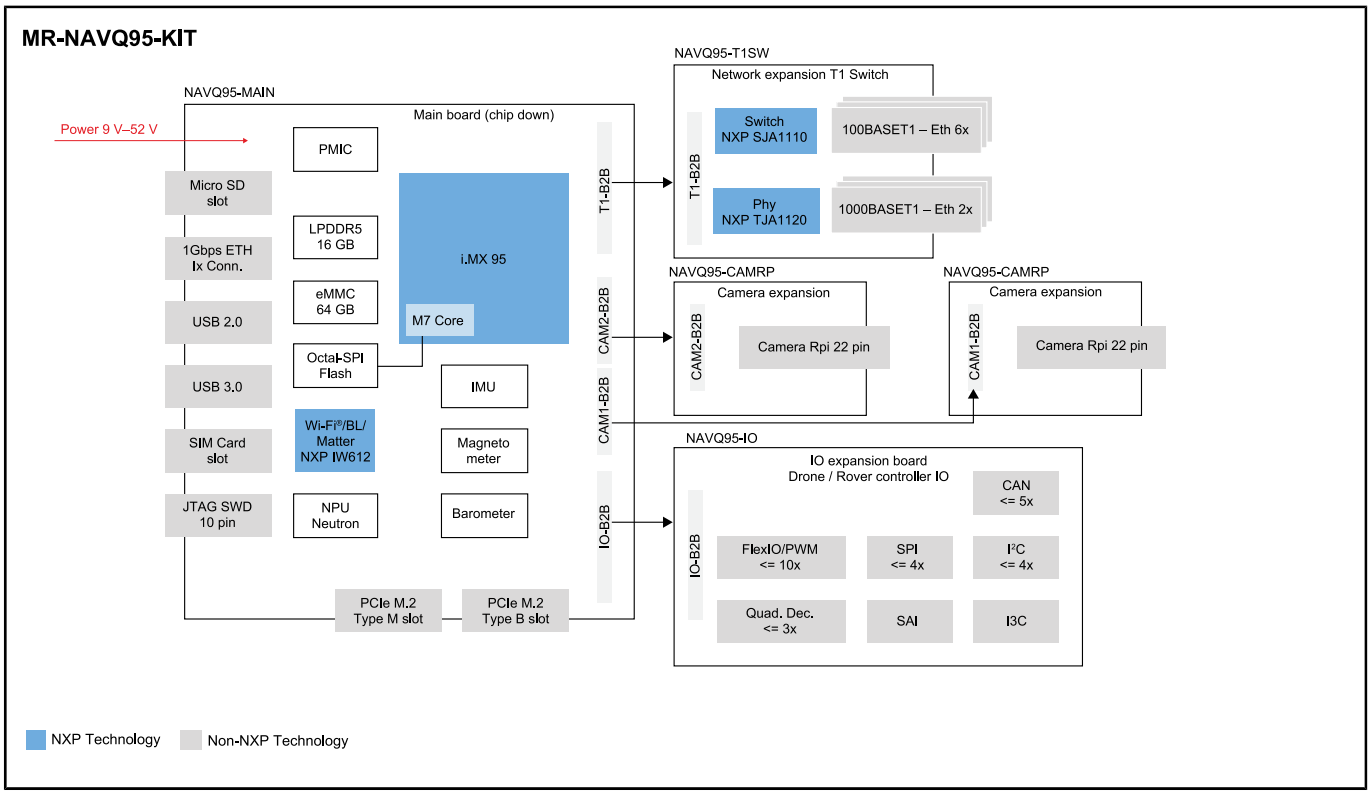

Preproduction

本ページには、試作段階の製品に関する情報が含まれています。記載されている仕様および情報は、予告なく変更される場合があります。詳細については、担当営業までお問い合わせください。

Last Updated: Nov 6, 2026

NavQ95 is an AI-powered autonomy compute and flight control reference design that unifies flight control, edge AI and autonomous decision-making on a single scalable platform. Designed for drones and intelligent robotics, it reduces system complexity, size, weight and power while accelerating development through an open software ecosystem based on PX4 and ROS 2. NavQ95 enables advanced perception, navigation and autonomy today, while providing a flexible path to future AI innovation without redesigning the core platform.
