

RAppID Initialization for Power Architecture

RAPPID

Last Updated: Oct 3, 2022

RAppID is a family of graphical development tools for the MPC5XXX family of Power Architecture® controllers that enables the user to quickly and easily configure the controller PLUS generate complete documentation. It can also be used as a learning tool to gain an understanding of the controller and its peripherals. RAppID not only generates C code for initializing the registers, but it also provides a system initialization function that brings the controller up in an orderly sequence. Use RAppID to save time and become an expert on the MPC5XXX Family.
