

S32J100 SDK for Automotive Networking

S32J100-SDK NEW

Last Updated: Oct 19, 2026

The S32J100 software development kit (SDK) provides a comprehensive set of software components and development tools that enable developers to create and customize firmware for specific applications. The S32J100 SDK includes software building blocks, development utilities and a collection of reference examples provided to help accelerate development and reduce time to market. The SDK is highly customizable, allowing customers to adapt and extend the software to meet their unique system requirements. Designed for maximum flexibility, the SDK is primarily delivered as source code, providing the visibility and control developers need for customization and integration.
