S32K5 Software Development Kit (SDK)

S32K5-SDK

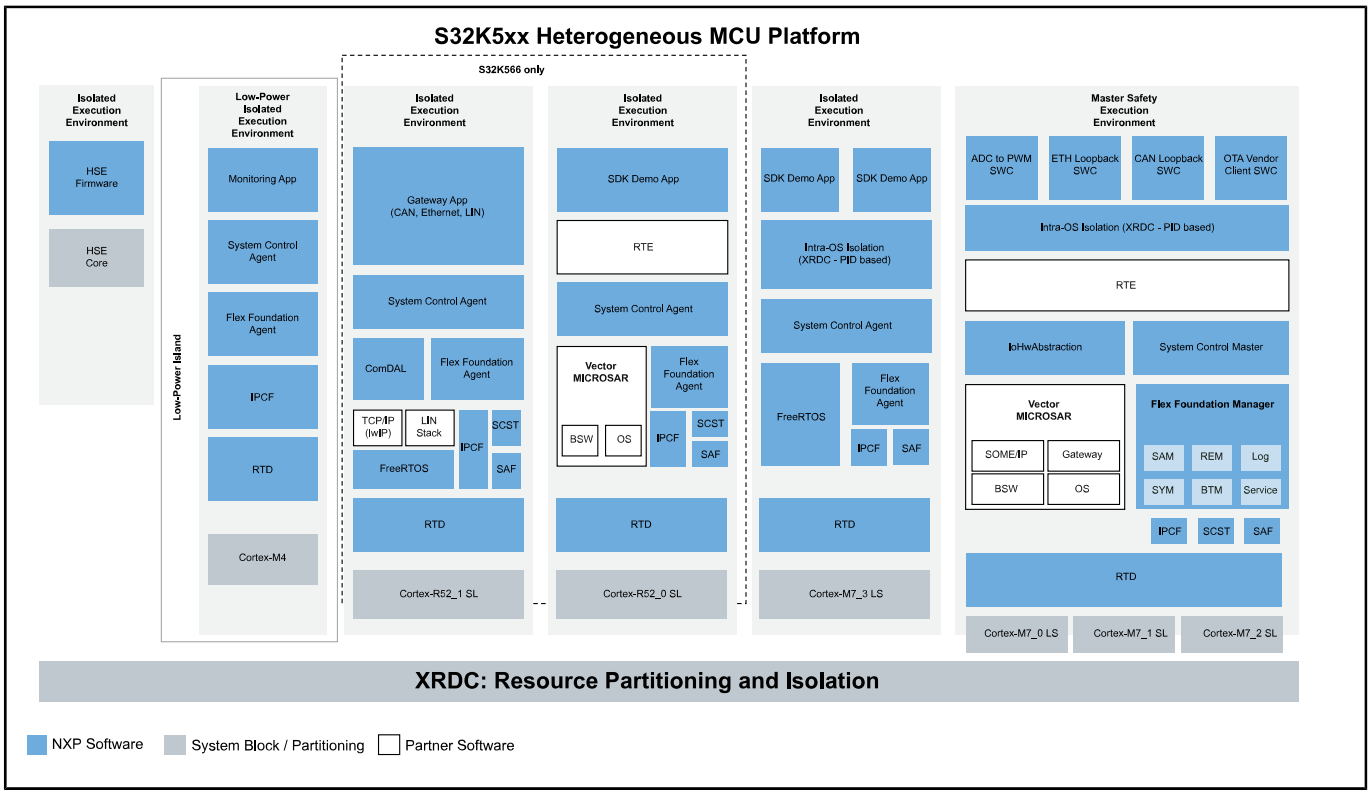

Last Updated: Nov 25, 2026

The S32K5 Software Development Kit (SDK) is a comprehensive software platform that accelerates development of zonal, electrification, and software-defined vehicle (SDV) applications on NXP S32K5 MCUs. It combines drivers, middleware, OS, safety and security software, development tools, partner ecosystem solutions, and integration examples into a validated environment that reduces integration effort, simplifies platform enablement, and helps developers move from evaluation to application development faster.
