

i.MX Surround View System

SURROUND-VIEW-APPLICATION

Last Updated: Oct 23, 2025

The NXP Surround View System is a technology which provides a 360-degree wraparound a view that can be used for automotive, industrial, and consumer use cases. Providing a 360-degree view assists the driver of an automobile in parking the vehicle safely. Industrial and consumer use cases include building, store and home views of the surrounding property or interior of key rooms for both security, safety and key retail use cases such as customer counting.
