i.MX 937 Applications Processor: Secure, Smart, Power# and Cost#Efficient, Scalable Edge AI Processing

i.MX937

Preproduction

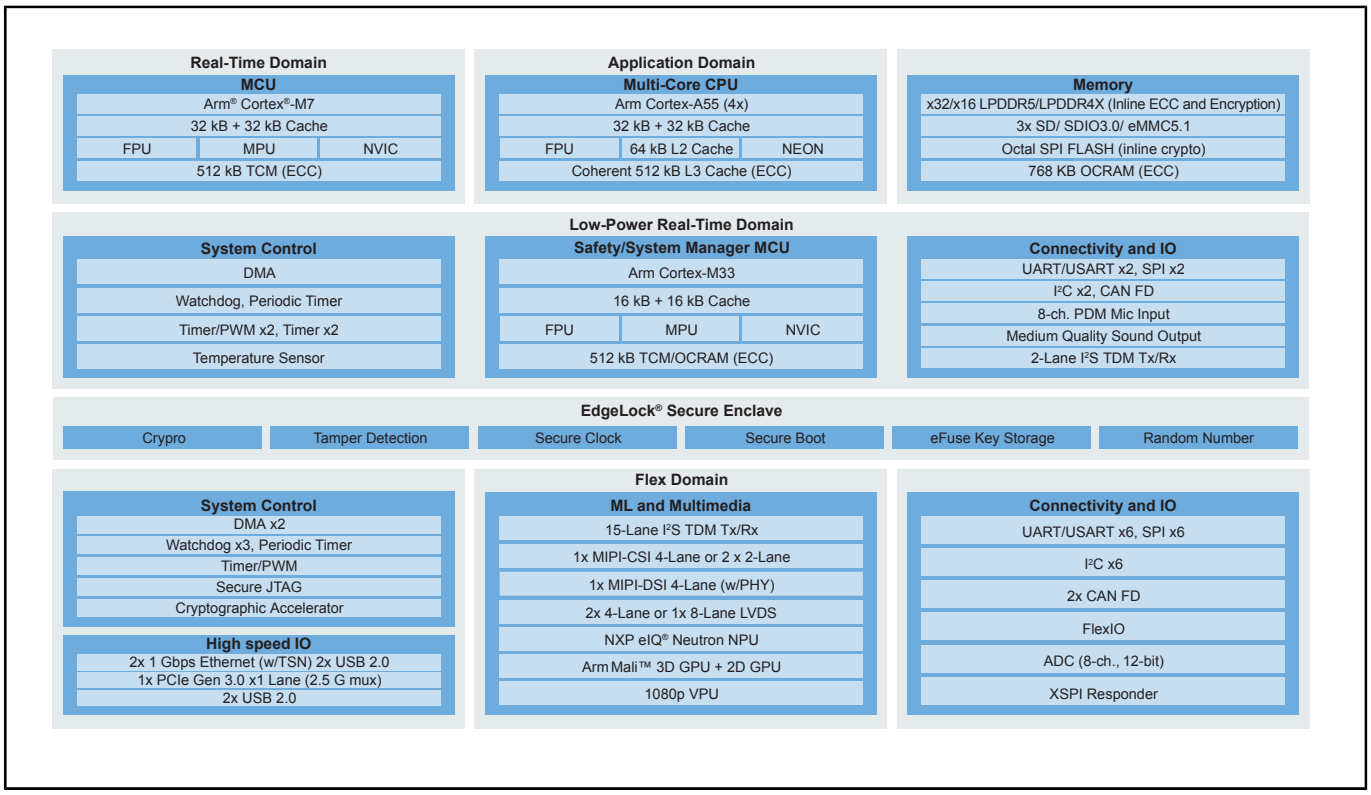

このページでは、試作品の情報を掲載しています。ここに記載されている仕様や情報は、予告なく変更されることがあります。追加情報については、 または営業担当者にお問い合わせください。

Last Updated: Nov 26, 2026

The i.MX 937 application processor is designed for power# and cost#efficient edge AI#driven applications, powered by the integrated eIQ® Neutron neural processing unit (NPU). It delivers 1080p60-capable graphics and video processing, vision and ML acceleration, efficient CPU performance and real#time processing, along with advanced security through the integrated EdgeLock® secure enclave to support energy#efficient edge computing. The processor targets automotive, industrial and commercial (IoT) applications.

Access to FRDM i.MX 937 development boards will be available in late 2026, with full silicon available in early 2027.
