

# Nearly 1 in 10 people are affected by diabetes. The Care Complete Diabetes program is here to help.

While there is no cure for diabetes, managing your diet and lifestyle can dramatically reduce your risk of serious complications such as heart and kidney disease or stroke.

Rightway does not replace your primary care doctor, but our licensed pharmacists are here to support you and take the uncertainty out of managing diabetes.

When you enroll in the Care Complete Diabetes program, a licensed pharmacist will assess your current diabetes status. They will also work with you and your doctor if medication adjustment is needed based on their assessment.

Here are some of the things the pharmacist can discuss:

- + Medications
- + Blood glucose monitoring
- + Vaccinations
- + Exercise
- + Annual foot and eye exams
- + Weight loss
- + Lab values

## THE BEST PART

You may be eligible to receive diabetes medications and supplies at a reduced price by enrolling in this program.
