

## CERTIFICATE OF COMPLIANCE - ODC Declaration -

The Montreal Protocol on Substances that Deplete the Ozone Layer (the "Montreal Protocol") sets out a mandatory timetable for the phase out of Ozone Depleting Chemicals (ODCs). NXP is aware that each country in which we manufacture NXP Semiconductor Products has ratified, or otherwise complies with, the Montreal Protocol through local legislation such as (EC) No. 1005/2009, (EU) 2024/590, or the U.S. Clean Air Act.

We hereby certify that, to the best of our knowledge, NXP has not used any ODCs in the manufacturing of any products sold to our customers since 2007. This certification applies to all of the manufacturing locations of NXP B.V. and its subsidiaries and affiliated companies<sup>1</sup>. In addition, we also certify that NXP semiconductor products do not contain any ODCs.

The signature below verifies that statements above, including but not limited to any material composition data are, to the best of our knowledge, valid and accurate. However, NXP cannot warrant that products from NXP's customers, in which such NXP products are incorporated, will in turn comply with this ODC Declaration.

v5 June - 2024

Edwin Bertotti  
Director, ECO-Products  
NXP Semiconductors

<sup>1</sup> NXP affiliates means the parent company "NXP B.V." and any and all corporations, companies, firms and or other legal entities in which NXP B.V. now or hereafter owns or controls, directly or indirectly, 50% or more of the nominal value of the issued share capital or 50% or more of the voting power at general meetings or has the power to appoint a majority of directors or other persons performing similar functions but such legal entity shall be considered to be an affiliate of NXP B.V. only for so long as such ownership or control exists.
