Release Notes

Freescale eTPU(2) Development Suite v10.0 Release Notes for Patch 1.1

TABLE OF CONTENTS

1   Known issues and Workarounds

Issue ID	Description
MTWX46525	**Issue:** Switch between multiple projects in the same workspace might result in unpredictable behavior. **Workaround:** Debug one project at a time
MTWX46628	**Issue:** Trace information file is generated in D:\ **Workaround:** Make sure that the workspace directory is on the same drive as the installation directory.

2   Changes included in Patch 1.1

2.1   Simulator changes

- Fix for MTWX47440: The capture registers source in some conditions was different that the one specified by the TBS[1] flag

- Fix for MTWX47720: Microcode changes to TBS flags don't update TBS register value

- Fix for MTWX47974: In em_b_dt mode, MatchB is unblocked by the clearing of MRLA

2.2 Compiler changes

- Upgraded to 1.4.3 version, see ETPU_10\Release_Notes\Compiler_Notes\FET Release Notes.txt for details
